## **Internship certificate**

### **To whom it may concern**

This is to certify that Mr. Mark Zurbrügg successfully completed three weeks (03.06.13-22.06.13) long internship at the Pharmacogenomics and Drug Metabolism research lab of the Department of Clinical Chemistry.

During the period of his internship program with us he had been exposed to various techniques in molecular biology. His internship activity mainly involved the development of a DNA sequencing assay for the human albumin gene in the framework of a research project.

Overall, I was highly impressed with Mark Zurbrügg's contributions to this research project during this short time period.

Please feel free to contact me should you have any questions or should you need any further information.

Sincerely yours,
